

FROM THE MTF AUTOMATION PROGRAMME: EASY COUNTING AND DISTRIBUTING

**MTF Multi-Rounder
MR-S1**

The **MTF Multi-Rounder** is part of the Multi-Tech Programme. With its 360° operating range it is made for precise counting and filling various containers. These functions allow an automatic material management.

Benefits

- Continuously variable height- and inclination adjustment to adapt to various conditions
- Integrated counting function for precise filling of various containers
- Additional functions already integrated in the control unit (e.g. free adjustable conveyor time-lag and/or clocked operation of the conveyor)
- Interface to utilise machine signals
- Robust underframe for secure standing
- Smooth integration into any process
- Little space requirements
- All components in proven MTF quality for reliable 24 hours non-stop operation at 365 days a year

MTF Multi-Rounder
MR-A1

Technical Data

- Two specifications: as stand-alone device type MR-S1 or accessory device type MR-A1
- Interface at the control unit for potential-free contact
- Chute made of ABS or stainless steel
- Wear-resistant planetary gear motor
- Available in various special versions
