

# FROM THE MTF AUTOMATION PROGRAMME: WEIGHING AND COUNTING TO OPTIMISE LOGISTICS

MTF Multi-Scale  
WT 0-60/20

The **MTF Multi-Scale Weighing Terminal** is part of the Multi-Tech Programme. It is often employed in combination with feeding and evacuation transport devices. The terminal rationalises the logistics in the factory by the determination of weight and/or quantity.

### Benefits

- Digital weighing terminal with LCD-display
- Indication as weight or quantity
- Broad weighing range up to 60kg
- High weighing accuracy up to 1g as a standard
- Visualisation of operating status by a 3-color light-column
- Available in different conveyor lengths and widths
- Easy connection of additional devices due to various interfaces
- Robust design in reliable MTF quality

### Technical Data

- Different modules with a weighing range from 0 to 60kg, with a reading precision of up to
- 1g as a standard
- Modules with different functions available (weighing, counting, accumulation, permanent storage function)
- Mettler Toledo scale with a load plate of stainless steel
- Max. load capacity 120kg incl. conveyor
- Integrated Siemens SPC control
- Moveable underframe with stationary columns
